Journal Announcement: 0010

Abstract: Digital Insight of Manchester is profiled. The company employs 85 people on a range of production activities centred on creative design and offers clients in a variety of business sectors, a fully integrated design, photography, repro, print and exhibition service. Following on from the purchase of an Indigo Omnius offset press, the company has recently researched and developed other original applications for digital printing, including leather. The way in which leather products (clothes, shoes and accessories) are **decorated** using Digital Insight's new patented Digitran process, is described. The report also discusses compatibility testing as another role planned for the Omnius.
